

Call for Abstracts

Technology Management for Smart, Open, Responsible Organizations and Ecosystems

IAMOT 2025

June 16-19, 2025, Montreal, Canada

We invite you to submit an extended abstract for the IAMOT 2025 Conference.

Hosted by the Research Centre for Intelligent Organizations and the SDG Innovation Network, IAMOT 2025 is committed to advancing knowledge through meaningful exchanges between academic, industry and government participations of various fields and disciplines related to technology management and to the general theme of Technology Management for Smart, Open, Responsible Organizations and Ecosystems.

Questions like the following will animate discussions and presentations in Montreal:

- What role does technological innovation play in creating sustainable agri-food supply chains?
- What innovative business models and strategies drive the future tech landscape?
- What strategies must be considered to maintain a balance between the necessary framework to ensure organizational cybersecurity and organizational agility?
- How can innovative technologies enhance workplace ergonomics and improve worker health in the context of Human-Centred Technology Management?
- How can performance measures reflect and promote the success of innovation projects of any kind as well as project management?
- How can organizations anticipate trends, adapt to changes and drive sustainable growth through strategic competitive intelligence initiatives?
- How can frugal economy help managers and workers promote a more creative, responsible, smart and humanized industry?
- How can the integration of AI-centered technology management lead to enhanced productivity and long-term competitiveness while maintaining ethical standards and prioritizing human welfare?
- How can Industry 4.0 support sustainable and intelligent supply chains?
- How can the philosophy and practice of frugal innovation be leveraged to reimagine business models, entrepreneurship, sustainability, societal impact, and digital transformation?
- How can a sustainable approach to research & development lead to emerging solutions to real-world problems?

Extended abstract submissions will be received until November 15, 2024.

Details regarding the extended abstract submission process are forthcoming. Please contact iamot2025@usherbrooke.ca with any questions.
